for clinicians and their patients

Connecting the vPEP® to a Nebulizer

Instructions for Use

Assembly

A. Fill the medication into your nebulizer cup per the manufacturer's instructions or as directed by your healthcare provider.
B. Attach the bottom of the T-Piece (#1) to the nebulizer cup lid (#2).
C. Follow the nebulizer Instructions for Use to set up to air supply and power appropriately.

For assembly with the vPEP device:

D. Connect the Mouthpiece (#3) to the small end of the T-Piece (#1).
E. Insert the larger end of T-Piece into the vPEP (#4).

Use

F. After assembly, put your mouth onto the Mouthpiece (#3).
G. Take your treatment following the nebulizer instructions, or as directed by your healthcare provider.

Cleaning and Disinfecting:

H. Clean and disinfect the vPEP and Nebulizer according to manufacturer's instructions, or as directed by your healthcare provider.

Single patient, multi use. Do not share or use on multiple patients. Not manufactured from latex natural rubber.

NON STERILE LATEX

Manufactured by:
