

**Designed by clinicians
for clinicians and their patients**

PocketPEP®

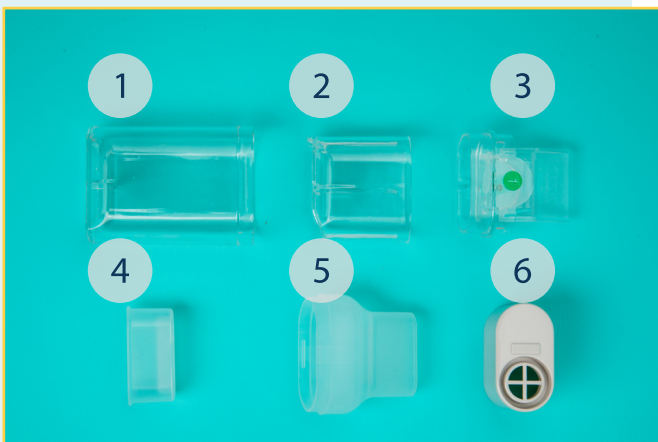

The PocketPEP® is a handheld OPEP device for lung expansion and promotes secretion clearance. PocketPEP® creates oscillating positive expiratory pressure when the patient exhales through the device, helping loosen and remove bronchial secretions associated with:

- Pulmonary Emphysema
- Chronic Obstructive Pulmonary Disease (COPD)
- Atelectasis
- Chronic Bronchitis
- Bronchiectasis
- Cystic Fibrosis
- Asthma
- Nonproductive cough
- Smoker's cough

PocketPEP® Features and Benefits:

- Ideal for patient use at home
- The palm-sized PocketPEP® is the smallest OPEP available, less than half the size of other products
- In acute settings, OPEP therapy is intended to reduce the risk of hospital acquired pneumonia
- When patients continue use of the convenient OPEP therapy at home, it can reduce risk of pulmonary complications post discharge
- PocketPEP® is easy for patients to operate and clean
- Optional T-piece adapts the PocketPEP® to accessories

PocketPEP®

Designed by clinicians for clinicians and their patients

Item	Description	Case Size
