

The OxyJET® is an innovative venturi adapter to provide supplemental oxygen during use of the vPEP® or PocketPEP®.

Features and benefits:

- When used with high flow oxygen during OPEP therapy, the OxyJET® may provide clinical benefits such as:
 - Adjunct positive airway pressure
 - Decreased work of breathing
- Includes an easy-to-read manometer for monitoring pressure so oxygen flow rate can be adjusted as needed.

OxyJET® Specifications

- DEHP free
- Not manufactured from latex natural rubber
- Must be used with the D•R Burton vPEP® or PocketPEP® OPEP devices

Ordering Specifications	Item	Description	Case/Size
	560	OxyJET®	10
